Vision Doeve Brokers

Former inland cargo ship that has been completely redesigned into a sailing live aboard / houseboat. The ship is completely self-supporting and equipped for a long stay on board. There are, among other things, 4 solar panels, a generator, a water purification plant, a central heating system and a pellet stove on board. At the front there is a large bedroom with a double bed. Followed by a bathroom with shower cabin. Then the galley and a spacious salon. Adjustments have been made to the transom and the stern beam, making the ship shorter and therefore no longer requiring a certificate.
