Vision Doeve Brokers

Aluminum motor yacht with aft cabin with in there a double bed, there is also a salon with inside steering position and a fixed bench, galley with a dinette and a toilet room. In 2024, the underwater ship and the hull were painted. In 2020, the electrical 230 Volt system has been upgraded to the current standard and a calorifier has been installed. There is also an outside steering position and with the folding windshield the ship has an air draft of approximately 2.50 meters. In 2010, a new diesel engine was installed, which has been running for approximately 1125 hours since then. In our view an interesting ship with a large cruising area for beautiful trips in the Netherlands, Belgium, France and Germany but also further to the east or to Scandinavia is possible.
