Vision Doeve Brokers

This motor cruiser with aft cabin was built by the Dutch shipyard 'De Ruiter'. Due to the existing convertible tent, the steering position can be completely closed off, so that you can steer completely protected against wind and weather. The spacious aft deck offers enough space for several people to sit there. In the aft cabin there is a double bed. Here is also the bathroom with toilet, sink and sitting bath located. The salon is spacious and equipped with generous windows that provide a good view outside. In the front part of the ship there is a sitting area/dinette, the galley and a guest cabin with bunk beds. A 14 kVA generator supplies the necessary power so that you can power all equipment without shore power if desired. There is some overdue maintenance to the paintwork outside, but in our opinion this is not a major job. In our opinion, this is a great family boat to spend weekends and holidays on.
