## Vision Doeve Brokers

A fishing cutter converted into a seagoing sailing yacht that unfortunately became a project due to circumstances. The underwater ship is in order. The woodwork above the waterline, the decks and the superstructure needs repair work. This also applies to the interior. That is also the reason why the price has been set at this level. Engine-wise and technically she is ready for use. The mast, boom and bowsprit are made of aluminium in wood. She has not been sailed in recent years and the vessel is not ES-TRIN certified. In our eyes it is a very spacious boat that after being repaired by a handy do-it-yourselfer will be a very good ship to make long journeys with or to live on.
